Convert steps to kilometers

» Definition: Kilometer A kilometre (American spelling: kilometer, symbol: km) is a unit of length equal to 1000 metres (from the Greek words khilia = thousand and metro = count/measure). It is approximately equal to 0.621 miles, 1094 yards or 3281 feet.

Steps to Kilometers | Kyle's Converter

Unit Descriptions; 1 Step: The distance covered by a single step assuming a stride length of 0.762 meters or 2.5 feet. Although stride length will vary by person and activity this may be useful in estimating distance traveled from the reading on a pedometer.

Convert step to km

1 metre is equal to 1.3123359580052 step, or 0.001 km. Note that rounding errors may occur, so always check the results. Use this page to learn how to convert between steps and kilometres.

Stridekick Steps to Distance Calculator

Individuals who are taller tend to have a larger average stride length and can cover more distance with fewer steps, while shorter individuals tend to rack up more steps per mile.

Umrechnen: Meter ? Schritte

Kilometer oder Meter in Schritte umrechnen - Tipps zum Messen der Schrittlänge und die Wahrheit über den „Mythos 10.000 Schritte pro Tag“. Meist kennt man die Länge der Laufstrecke, aber nicht die Anzahl der gelaufenen Schritte. Mit dem Schrittrechner können Kilometer in die Anzahl der Schritte umgerechnet werden.

What I Learned from Walking 15,000 Steps Per Day

Discover what the Get-Fit Guy learned from quantifying his steps by walking 15,000 steps per day.

Schritte in Meter umrechnen: ermitteln Sie Ihre tägliche ...

Mit der eigenen Schrittlänge multipliziert kann man die Anzahl der Schritte in gegangene Meter, besser natürlich Kilometer umrechnen. Das funktioniert auch mit dem Schritte in Meter Umrechner oben ganz einfach.

How many km are in 10000 steps?

A kilometer (km) is a decimal multiple of the meter, the International System of Units (SI) unit of length, approximately equivalent to 39.37 inches.

The 10,000

Previous research by the same team had recommended that girls aged between six and 12 should accumulate 12,000 steps a day and boys 15,000 a day. Yet such levels are only a starting point.

How to Convert Pedometer Steps to Kilometers | Livestrong.com

You can also convert miles to kilometers. Approximately 2,000 steps equals one mile. One mile equals 1.60934 km. At the end of the day determine how many miles you have walked by dividing your total steps by the number 2,000. Then, multiply that number by 1.60934. The result equals the number of kilometers you walked.
