American woman who uses an incredible trick to sing songs until it pushes the auto driver to use the meter.

Antibody response to Haemophilus influenzae type

Haemophilus influenzae type-b (Hib) conjugate vaccine (HibCV) increases antibody concentrations in asplenic patients, and most of these patients have antibody levels greater than 1.0 µg/ml after vaccination. Therefore, HibCV should be administered regardless of previous vaccinations and the time that has elapsed after splenectomy, even if antibody evaluation is not available.
