Batch Script Tutorial

Batch Scripts are stored in simple text files containing lines with commands that get executed in sequence, one after the other. Scripting is a way by which one can alleviate this necessity by automating these command sequences in order to make one's life at the shell easier and more productive.

Learn Command Line and Batch Script Fast (3 Book Series)

From Book 1: The Windows command line is a commonly used tool for IT support and system administration. Batch scripting is a tool for automating the command line.

Guide to Windows Batch Scripting

This series will share some conventions I picked up along the way for scripting in Windows via command prompt batch files. The Windows PowerShell is definitely sweet, but, I still like batch files for their portability and low friction. The Windows command line is very stable – no worrying about the PowerShell interpreter path, which version of PowerShell the server is running, etc.
